General

The Center has disposed of more than 97 cubic feet of records each month during fiscal year 1956. There is still a large backlog, 300 cubic feet, of material for disposal. The Center is presently working on the most effective and economical solution to solve this problem. It is anticipated by the end of this fiscal year that the backlog of records for disposal will be much greater. This is another problem that emphasizes the urgent need for labors to be assigned to the Center.

The Center had the following visitors during the week:
